Leadership Institute Spring 2013

Leadership and Learning are indispensible of one another
-John F. Kennedy

What is Leadership Institute?

Leadership Institute is a 7-week program designed to assist students with becoming more effective leaders in organizations on campus as well as in the classroom. The Leadership Institute also develops students' personal growth and development through active participation in discussion, exercises, and workshops.

Leadership Institute Spring 2013 Program Components:

Mentor Program

The mentor program is designed to provide individual contact with an established leader at Merrimack College. To foster discussion of leadership topics covered in the Leadership Institute outside of sessions. Leadership Institute assists participants in setting goals for their development that are individually focused based on experience and ability. The mentor program is designed to connect students with more members of the Merrimack Community in an effort to provide an additional person to serve as a campus resource for them.

Diversity Program

Students will attend the Tunnel of Oppression immersion program the first weekend of March. This is an interactive event that highlights contemporary issues of oppression and introduces participants to the concepts of oppression, privilege, and power. Students will then write a reflection paper exploring what they learned and will discuss reflections at the following Leadership Institute class.

Service Program

All Leadership Institute participants will have the opportunity to interview a leader from a local non-profit organization and present their experience with the group.
