MAJOR**

Teacher of Students with Moderate Disabilities (PreK-8)

Merrimack College's School of Education offers dynamic, responsive, and focused programs that prepare and support individuals to be thoughtful, passionate, and competent teachers and educational leaders. The Teacher of Students with Moderate Disabilities program is accredited by the Massachusetts Department of Elementary and Secondary Education (DESE) and in concert with Merrimack College's General Education requirements, fulfills the requirements for licensure within the state of Massachusetts to teach in Preschool through 8th grade.

TEACHER OF STUDENT WITH MODERATE DISABILITIES (PreK-8) PROGRAM REQUIREMENTS

EDU 4320 Teaching Social Studies	2		

ADVISING

All students in the School of Education have an education advisor as well as an advisor in their double major. Advisors have regular office hours, so please check with them regarding any questions you may have. Check the College's *Academic Calendar* for advising dates.

MTELS

Students must take and pass all relevant MTEL tests prior to student-teaching. Teacher of Students with Moderate Disabilities candidates will need to take the Communications & Literacy, Foundations of Reading, and General Curriculum tests. The School of Education offers MTEL preparation workshops, so check our website for times and dates.

PRACTICUM

All students have multiple opportunities to gain in-depth observational and practical experience in the classroom that help link theory to practice within a classroom environment designed to fit the student's area of interest. Students begin to develop their education philosophy, create a portfolio and establish meaningful professional relationships with their students, cooperating teachers and colleagues. The culminating experience for all future teachers is the semester long student-teaching (the practicum). All students should have a 3.0 cumulative average and pass the MTEls as a pre-requisite for practicum placement. See the Merrimack College Catalog or the website course descriptions for pre-practicum and practicum requirements.

DUAL

A candidate for Teacher of Students with Moderate Disabilities may be very well served by gaining a dual license that offers greater flexibility and future job opportunities. We offer a dual license in Elementary Education (grades 1-6) and Moderate Disabilities (grades preK-8) by taking an additional practicum experience. Talk with your advisor about whether this may be the right choice for you.

CHOICES

As a candidate for Teacher of Students with Moderate Disabilities, consider majoring in Human Development or double-majoring in our STEM (Science, Technology, Engineering, and Mathematics) Education major. Students can also minor in Educational Studies, which provides a multidisciplinary perspective on issues of educational theory, policy, and leadership.

GENERAL EDUCATION REQUIREMENTS

All students must meet the College's General Education (formerly referred to as Institutional & Distributional) requirements by successfully completing approved courses on the Liberal Studies Core Curriculum Master List.

Additionally, students seeking DESE (Department of Elementary and Secondary Education) teacher licensure must complete DESE distribution requirements. With careful planning, students can choose courses that fulfill both Merrimack College General Education requirements and DESE licensure requirements. Please meet with your advisor to create a course schedule.

Please note that the former Institutional & Distributional requirements still apply to current students. The new General Education requirements apply only to incoming fall 2012 students and beyond (and all transfer students).

If you have questions or need more information, please contact the School of Education at **978-837-5452**.
