

Lydia Gugliuzza

Honors Peer Mentor

Hi! My name is Lydia and I am currently a Junior here at Merrimack. I am so excited to meet you all and be a member of your support system as you start this very exciting journey over the next four years! Starting college can be nerve wracking and stressful, but I am here to help guide you, and be a resource for you along the way.

I love science. I am a biology major with a minor in psychology. My dream job and future plans after graduating are to attend grad school to become a Genetic Counselor. I love music across all genres, especially classic rock and I am currently teaching myself how to play the keyboard. I enjoy watching all types of TV shows and movies. Please let me know if you have any questions!
